B | 5,853,895, which is a continuation of Serial No. 08/420,233, filed April 11, 1995, now abandoned, the disclosures of which are hereby incorporated by reference herein.--

[Page 11, lines 1-11, please delete the entire paragraph and substitute the following paragraph:

B2 --Figs. 3 and 4 illustrate in greater detail window assembly 12. Panel 24 is preferably transparent glass which is typically tempered, but may be laminated, or otherwise strengthened using conventional techniques and principles. Panel 24 may be curved, bent or generally planar, having two substantially parallel sides, surfaces, or faces 20, 22 terminating in a peripheral edge 18. Although transparent glass is preferred, other sheet-like panel materials may also be used such as opaque or coated glass, privacy glass, glass with a layer of ceramic frit, tinted glass, solar tinted glass, transparent, coated or opaque plastic materials, or multi-composite laminates, such as transparent glass and plastic. Additional details and variations of vehicular window assemblies are described in a copending application to the same assignee as the present application, Serial No. 08/129,671 filed September 30, 1993, now U.S. Patent No. 5,551,197, issued September 3, 1996, which is herein incorporated by reference.--

T IN THE DRAWINGS:

A letter has been sent under separate cover to the Official Draftsperson requesting approval and entry of 8 sheets of corrected, formal drawings including Figs. 1-35. A copy of that transmittal letter and the 8 sheets of corrected, formal drawings is attached. These drawings correct the informalities noted in the drawings as originally filed. Approval and entry of these corrected, formal drawings is respectfully requested.

REMARKS

Receipt of the Office Action of February 21, 2001, is respectfully acknowledged. Claims 131-181 were originally examined. Claims 167-181 now remain in
